

On the Subject of Fishing

How is your luck?

- This module contains a reel button and a fishing rod.
- Press the reel button to cast the fishing rod.
- Once you catch your fish, you can either press the keep button to keep your catch or press the throw button to throw your catch.
- To solve the module, catch N fish, where N is equal to the number of non-needy modules, or catch the fish that the module calculates.
- The table shows the kind of fish that solve the module.
- Here are the calculations the module uses for special kind of fish.
- If there is a parallel port: +8
- If there is a PS/2 port: +4
- If the serial number letters are all vowels: +2
- If the serial number numbers are all even: +1

Number:	Fish Picture:	Fish Name:
0		Bluegill
